

ADC AD-265

25-lb Capacity Coin Dryer

Standard Features:

- 25-lb. Capacity
- 8.43 cu. ft Basket Volume
- 60,000 btu/hr heat input, 400 cfm. airflow
- Axial Airflow
- Steel Door with Gasketless Glass
- Available in Gas Heat
- Only 29-5/8" Wide

Optional Features:

- Stainless Steel Front, Cabinet & Basket

AD-265 Coin Dryer

Why Purchase ADC AD-265?

Engineer Driven Design That is Built to Last

Our dryers showcase ADC's engineer-driven approach to design. The drive system is a "belt around the drum" system, a direct drive system where the belt wraps around the shaft of the drive motor and then around the tumbler. The drive system also has a spring loaded tensioner to maintain proper belt tension. And our dryer cabinets and accessories are electrostatically powder-painted inside and out and baked at 420-degrees fahrenheit before final assembly. - ensuring the hardest surface and the longest lasting finish in the industry.

Rugged Steel Door with Gasketless Door Glass

Our dryer doors are one solid piece of steel with gasketless glass. This eliminates the issue of glass falling out due to wear and tear on rubber gaskets that some manufacturers use to secure glass. The security and durability that gasketless glass provides is essential to a successful laundromat operation.

Easy-to-Read, Multilingual Controls

We were the first to bring computer operated dryers to the market and today we continue to be a leader in applying technology to dryer operation. Our years of experience along with our accessible design, easy-to-read LCD screens and our user friendly multilingual interface position ADC as the pioneer in the laundry industry.
